

# CADRe

Centre for Accelerated Drug Redeployment

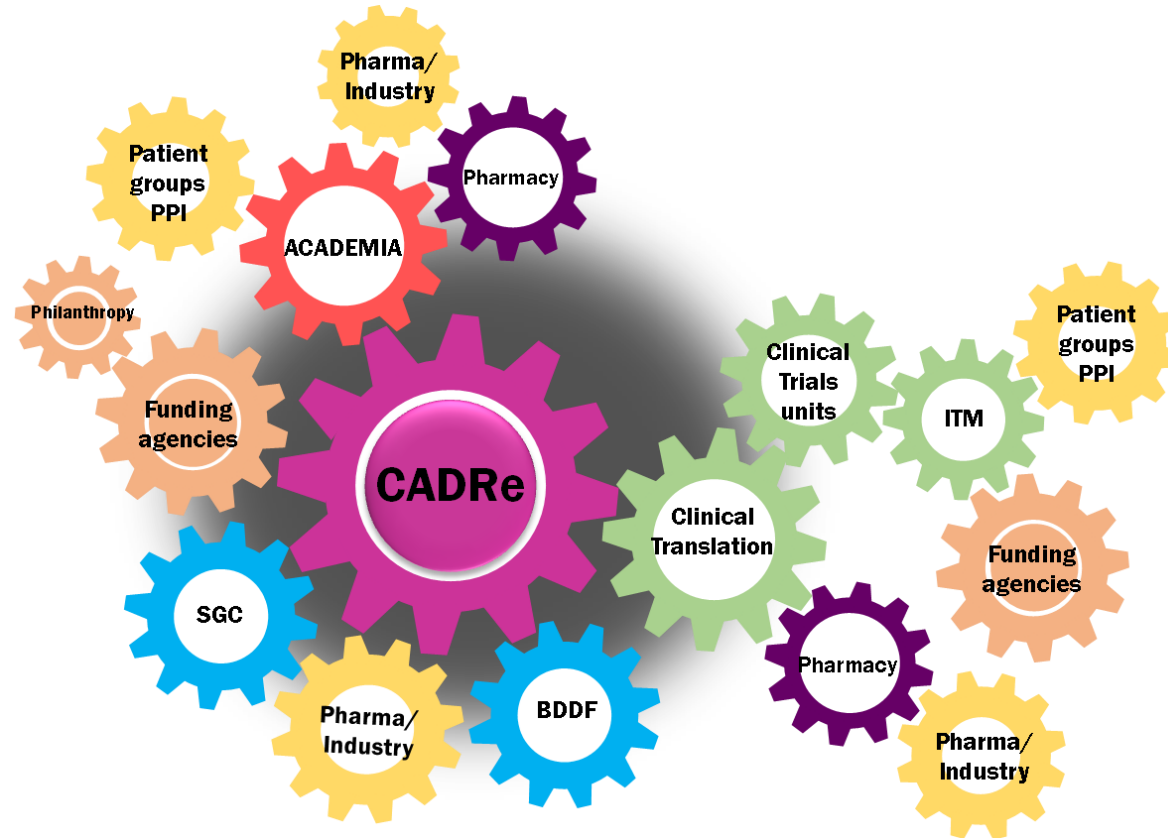

Dr Farhat Khanim

# The drug development pipeline

# The “blackhole” of translational research

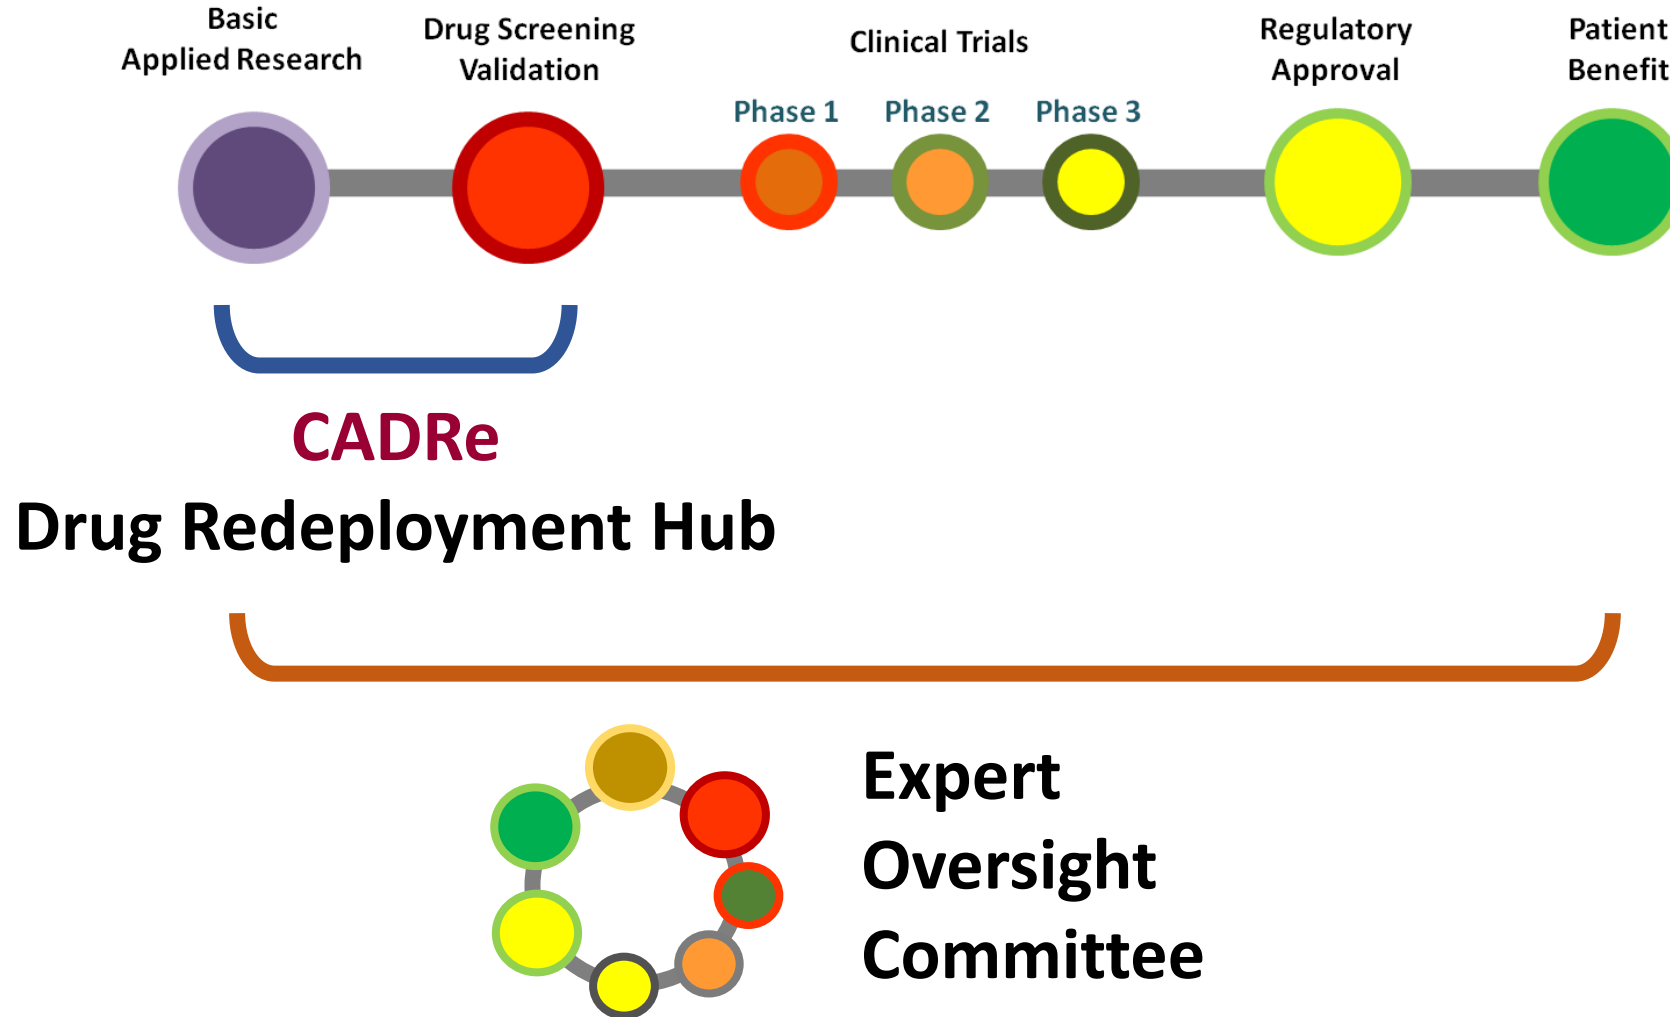

The aim of CADRe is to bridge the “blackhole” that exists between so much of our high quality academic medical research and its translation to the clinic

## Our Mission

*To improve impact from academic research and patient quality of life in developing and developed countries by accelerating the identification of **effective and affordable combination therapies** using drug redeployment and delivering them to **early phase clinical trials within 3 years.***

# Accelerating the pipeline

## Partnership is key to acceleration
